

Predicted ABB?

Top courses you can still get

Russell Group courses where ABB was the most common grade students actually got in with. The published entry requirements next to the real grades, 2023 to 2025.

@EduStrategyCaroline

The entry requirements aren't the whole story

In every course here, ABB was the single most common grade students actually got in with, from UCAS achieved-grades data, 2023 to 2025. That is the typical entrant, not a one-off. The entry requirement is what they advertise. The achieved range is the full spread of grades that got in. The gap is the point.

One important thing

Not Oxford, Cambridge, Imperial, the LSE or UCL, those genuinely want AAA and above. It's the brilliant tier just below.

How to check any course

This is a starting point, not the whole list. Look up any course and check the grades students actually achieved, not just the entry requirements. That gap is the difference between ruling a uni out and getting in.
